**ACADEMY OF DENTISTRY
TORONTO**

48TH ANNUAL WINTER CLINIC

**THURSDAY
NOVEMBER 28, 1985**

Colgate Professional Services welcomes you to the 1985 Winter Clinic of the Academy of Dentistry

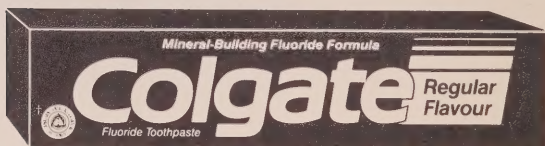

Colgate's two-fluoride formula
provides superior cavity protection
to a single-fluoride formula*.

Only today's Colgate has
a two-fluoride formula.

When you recommend Colgate you're
recommending an innovative product—
offering advanced and clinically-tested
cavity protection.¹

*Sodium monofluorophosphate (0.76%)

1. Hodge, H.C., et al, Brit. Dent. J., 148, 201-204, 1980

†"Colgate Toothpaste contains sodium monofluorophosphate and sodium fluoride which are, in our opinion, effective decay preventative agents and are of significant value when used in a conscientiously applied program of oral hygiene and regular professional care."

OUR ACADEMY

The ACADEMY OF DENTISTRY, formerly the Toronto Dental Society, has been functioning continuously since 1889. It has provided leadership and service to both the profession and the community, and will continue to do so in the future.

The OBJECTS of the Academy are:

1. Advancement of the art and science of dentistry.
2. To promote the highest ideals of dental practice.
3. Cultivation of harmony and good fellowship among its Fellows, and among the members of the dental profession generally.

Some of the specific services provided are as follows:

1. The Annual WINTER CLINIC.
2. After hours EMERGENCY TREATMENT service for the public.
3. The Annual INFORMATION BOOK, a directory of dental organizations.
4. The LADIES' AUXILIARY, which provides support for worthy dental projects, and various fellowship activities.
5. PUBLIC RELATIONS, a secretary to answer the public's queries and complaints.
6. An ELECTED COUNCIL, representing all Metro Toronto dentists and their local component societies.
7. CO-ORDINATION of dental and fellowship functions within Metro Toronto.
8. DENTAL MEETINGS with excellent programs and clinicians.
9. Assistance in formation of new STUDY GROUPS.
10. HONORARY MEMBERSHIP to recognize outstanding dentists.
11. ARCHIVES for historical dental information.
12. Fellowship activities such as the Annual GOLF TOURNAMENT and CURLING BONSPIEL.
13. MEDIATION services for the public.
14. COMMUNICATION with dental auxiliary organizations.
15. LIAISON with local government and other community groups.
16. Provides an ASSOCIATE PLACEMENT service.

**THIS IS OUR ACADEMY.
KEEP IT STRONG.
SUPPORT IT, ENJOY IT.**

PRESIDENT'S MESSAGE

ALEXANDER J. PUSKAS
B.A., D.D.S.

This year the Academy is sponsoring its 48th Annual Winter Clinic and an attendance of over 2000 members and auxiliaries is anticipated.

Of course the excitement is all about the move from the Royal York Hotel, our traditional meeting place, to the new Convention Centre where assistants, nurses, hygienists and dentists will all meet together once again. As you can well imagine, a program of this size can only come together through the teamwork of many dedicated people. And this year is no exception.

Under the leadership of Dr. Stu Sigesmund, Chairman, and our devoted Academy staff, Mrs. Raisyl Wagman Executive Secretary and Mrs. Nancy Self, Secretary, numerous committees have been working diligently during the past year to bring you a spectacular learning experience. They have assembled an impressive array of headline speakers, group clinics, table clinics, commercial exhibits and a treatment workshop.

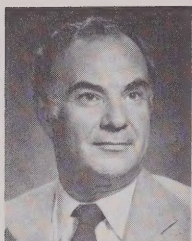

The Academy is the co-ordinating council for 1434 Toronto dentists, all of whom have membership affiliations with one of the four Metro Toronto O.D.A. component societies. Our members of today have a proud heritage in the Academy. Since 1889, we continue to strive:

- To advance the art and science of dentistry
- To promote the highest ideals of dental practice
- To cultivate harmony and fellowship among its Fellows and among the members of the dental profession generally.

Welcome to the Toronto Convention Centre and thanks for supporting your Academy by attending our Winter Clinic.

On behalf of the Academy Council, it is my pleasure, indeed my privilege, to extend best wishes to all of you for a successful day of continuing education, fellowship and renewal.

**AGD ACCREDITATION IN
THE REGISTRATION AREA**

CHAIRMAN'S WELCOME

STEWART L. SIGESMUND
B.A., D.D.S., F.A.G.D.

On behalf of the Academy of Dentistry, it is indeed my pleasure to welcome you to the 48th Annual Winter Clinic Meeting.

This is an exciting year for our Winter Clinic as it is the first time we are holding our meeting at the new Metro Toronto Convention Centre. By doing so we are able to have our entire dental team with us. The Committee looks forward to many superb clinical presentations, and is pleased that Dr. Jim Pride (Practice Management) and Dr. Ron Jordan (Composites) are the featured speakers.

For our luncheon speaker we will have the privilege of being entertained by one of Canada's foremost comedians, Dave Broadfoot.

We hope you will plan to attend this special day of education and fellowship.

JIM PRIDE TALKS BUSINESS IN TORONTO

**JAMES RANDOLPH PRIDE
D.D.S.**

SYNOPSIS

Dr. Jim Pride is well known to members of the dental community as a dynamic speaker and a leading expert on all aspects of the business of dentistry. He will explore the important role of the staff in the efficient and productive functioning of your dental practice.

- Marketing Cycle Management
- Sustaining Practice Momentum
- Managing Your Numbers
- Solid Team Formation

Dr. Pride is one of the few men in his field selected by the American Dental Association to participate in their programs. He presents valuable information for the general dentist, the dental auxiliary and the specialist in building a successful practice.

BIOGRAPHY

Dr. Pride is the founder and Co-Director of the Pacific Institute, a national non-profit organization committed to the preservation of private practice by improving the ethical business skills of practising dentists. Dr. Pride is a nationally recognized authority and lecturer on a full range of practice management topics. He is former Assistant Dean of the University of the Pacific, School of Dentistry.

We suggest that this lecture will be of great benefit to the dentist and his entire dental team.

NEW MATERIALS AND RECENT ADVANCES IN RESTORATIVE DENTISTRY

RONALD E. JORDAN
D.D.S., M.S.D., F.I.C.D.,
F.R.C.D.C.(H)

SYNOPSIS

This course will present clinical research materials-techniques data in several important areas of conservative operative dentistry, namely, *the new composite resin materials*; dentin bonding systems – self and light cures; ionomer-composite combination; posterior composite restorations; conservative treatment of the discoloured dentition; direct composite veneers; indirect composite veneers; indirect porcelain veneers.

BIOGRAPHY

Dr. Jordan is presently Associate Dean, Clinical Affairs, Faculty of Dentistry, University of Western Ontario. He received his D.D.S. from the University of Alberta and maintained a general practice of dentistry in Winnipeg until 1960. The M.S.D. degree in Restorative Dentistry was received from the University of Washington, Seattle in 1962. From 1962-1964, Dr. Jordan was Head, Department of Operative Dentistry, Dalhousie University, and from 1964-1966 he was Research Associate, Cleft Palate Research Centre and Head, Operative Dentistry, University of Pittsburgh in Pennsylvania. Dr. Jordan was Chairman, Department of Restorative Dentistry, University of Western Ontario from 1966-1983. He is a member of several societies and is the co-author of two textbooks and author of thirty-two scientific papers. Dr. Jordan also holds several consultationships.

— LUNCHEON SPEAKER —

DAVE BROADFOOT

Dave Broadfoot presents us with his satiric view of contemporary North American life and speculates hilariously on the future of the continent, demolishing our anxieties in the process.

Some rave reviews —

"Canada's Bob Hope"
Variety, New York

"Her Majesty confided to me later that her favourite had been the satirist Dave Broadfoot, who had been so clever"

Memoirs of Prime Minister Lester B. Pearson

"Comedian Dave Broadfoot had him (President Reagan) guffawing throughout the five minutes he was onstage."

The Citizen, Ottawa

“H.O.M.E. FOR THE DIFFICULT CHILD” AN APPROACH THAT WORKS

**THEODORE C. LEVITAS
D.D.S., M.S.D., F.A.C.D., F.I.C.D.**

SYNOPSIS

Completion of needed dental treatment for the young child is often delayed. This is not because the dentist is unable to perform the technical procedures indicated. Rather, it frequently occurs because the dentist loses control and the child takes over. This presentation is designed to discuss the problem of the “reluctant” child and suggests an approach to the management of the child that has proved successful. It is essential, at the outset, to establish who is in charge. Only then can there be mutual respect which, in turn, will engender cooperation. The understanding of HOME (Hand Over Mouth Exercise) can be an important step in this direction.

Color slides, a sound film, and audio tapes will be used to supplement the lecture.

PLACE: Room 202 C&D

TIME: 9:00 - 11:00 a.m.

CHAIRMAN: Dr. Brian Kumer

ESTHETIC RESTORATIVE DENTISTRY FOR CHILDREN

**THEODORE C. LEVITAS,
D.D.S., M.S.D., F.A.C.D., F.I.C.S.**

SYNOPSIS

For many years children were excluded from the concept of esthetic dentistry. The attitude, all too often, was patch up or make do.

Today we know that not only is it possible to achieve esthetics for children, but also that children and their parents want this consideration. These procedures include treatment of posterior teeth as well as anteriors. Just because a tooth cannot be seen does not mean its appearance is not important. This presentation will discuss a variety of materials and techniques to demonstrate some of what can be done to provide esthetic restorative dentistry for children because KIDS CARE TOO.

PLACE: Room 202 C&D

TIME: 2:30 - 4:30 p.m.

CHAIRMAN: Dr. Warren Hellen

BIOGRAPHY

Dr. Levitas, a native of Atlanta Georgia, received his undergraduate, dental, and graduate training at Emory University. His practice is limited to pediatric dentistry and he has lectured extensively throughout the United States, Mexico, Canada, Spain, Greece, France, Ireland and Israel. In addition he has contributed to literature.

Dr. Levitas is a Fellow as well as a Past President of the American Academy of Pediatric Dentistry. He is; member of the Board of Directors of the Academy of Dentistry for the Handicapped; a Past President of the American Society of Dentistry for Children; Fellow of the American College of Dentistry, the International College of Dentists and is an Honorable Fellow of the Georgia Dental Association.

Dr. Levitas is: a Past President of the Fifth District and the Northern District Dental Societies of Atlanta; a Past General Chairman of the Thomas P. Hinman Dental Meeting; a Founder and a Past President of the Southeastern Society of Pedodontics and is a Past President of the Medical/Dental Staff of the Scottish Rite Children's Hospital. He has also been active in civic organizations. Dr. Levitas and his wife Miriam have six sons and one daughter.

OSSEOINTEGRATION IN CLINICAL DENTISTRY

GERALD A. NIZNICK
DMD., MSD.

SYNOPSIS

Restoration of the totally edentulous jaw remains the one problem that "conventional" dentistry has failed to adequately solve. Dental Implants hold the answer to this debilitating condition that affects approximately 25 million Americans. In the partially edentulous jaws, implants can serve as additional abutments to allow construction of a fixed prosthesis. Clinical studies now exist that can withstand scientific and statistical scrutiny and prove the long term predictability of endosseous implants that can achieve direct attachment to vital bone termed "osseointegration". The clinical and histological research and surface science aspects of implantology will be discussed. The Core-Vent Implant System has proven to achieve osseointegration on a highly consistent basis. The simplified surgical procedures and versatile prosthetic applications of this system will be covered in detail, showing how it can be incorporated into clinical dentistry for stabilizing overdentures, free-standing single tooth replacements, fixed prosthetic abutments and full-mouth rehabilitation.

BIOGRAPHY

Member of the American College of Prosthodontists
Active member in the American Academy of Implant Dentistry
Diplomat of the International Congress of Oral Implantologists
Dental Degree – University of Manitoba (1966) DMD
Post Graduate Certificate in Fixed Prosthetics – USC (1967)
Graduate Degree in Prosthetics – Indiana University (1969) MSD
Developer of the Core-Vent Implant System

PLACE: Room 205 A&B

TIME: 9:00 - 11:00 a.m.

MURRAY McDONALD MEMORIAL LECTURE

Sponsored by the Canadian
Fund for Dental Education

WILLIAM F. MAY, B.D., Ph.D.

SYNOPSIS

Are professionals anything more than technicians/entrepreneurs? If so, what distinguishes them? And what obstacles do they face in making good on their professional identity? This lecture on the intellectual and moral marks of a professional will attempt to answer these questions.

BIOGRAPHY

William May joined the Kennedy Institute of Ethics, Georgetown University, in 1980. He is the Joseph P. Kennedy Sr. Professor of Christian Ethics. A 1948 graduate of Princeton University, he received his B.D. magna cum laude (1952) and Ph.D. (1962) degrees from Yale University. Dr. May has published essays on religion, politics, professional ethics and biomedical ethics. He has presented many seminars on management ethics and humanities for the medical profession and business executives. Dr. May has spoken on such topics as "Art and Criminality" and "Terrorism as Strategy and Ecstasy". Westminster Press recently published his book *The Physician's Covenant; Images of the Healer in Medical Ethics*, November 1983. Dr. May received a Guggenheim Fellowship to work on the public obligation of the professional, a book which will eventually bear the title *The New Rulers of the West*.

Dr. May is married to New York actress, Beverly May and they have four grown children.

The *Murray McDonald Memorial Lecture* was established by the Canadian Fund for Dental Education in honour of its former Executive Director.

Dr. May, whose Canadian tour will include presentations at all ten dental schools, is the first speaker of the Murray McDonald Memorial Lecture.

PLACE: Room 201 E&F

TIME: 10:15 - 11:15 a.m.
3:45 - 4:45 p.m.

CHAIRMEN: Dr. David Parr

COMMON MEDICAL PROBLEMS ENCOUNTERED IN DENTAL PRACTICE

GUY EMERY, M.D., F.R.C.P.(C)

SYNOPSIS

This talk will include a brief discussion of the management of major cardiac, respiratory, hepatic and metabolic conditions in patients seen in an average dentist's practice. Time permitting, a question and answer session will follow.

BIOGRAPHY

Dr. Emery received his medical degree at Queen's University, Kingston, in 1960. Following six years of post-graduate study in Medicine and Endocrinology (in Toronto and London, England), he became a Fellow of the Royal College of Physicians of Canada, and joined the Faculties of Medicine and Dentistry at the University of Toronto. He gives lectures and seminars in General Medicine to Third and Fourth Year Dental Students.

ENDODONTIC THERAPY – LET’S TAKE A HARD LOOK AT CURRENT METHODS AND FUTURE DIRECTIONS

KENNETH L. ZAKARIASEN
B.A., D.D.S., M.S., Ph.D.

SYNOPSIS

Many treatment modalities have been introduced in recent years to improve and/or make more time efficient endodontic therapy. Such things as ultrasonics and sonics have been introduced to improve canal debridement and preparation, while warmed-gutta percha systems have been introduced for canal obturation. Are these developments the ultimate in endodontic therapy or can we progress even further? This presentation will address this question and suggest that such advanced technology as lasers may provide new avenues for continued development of therapy.

BIOGRAPHY

Dr. Zakariasen received his B.A., D.D.S., M.S. (Endodontics) and Ph.D. (Epidemiology) degrees at the University of Minnesota. He served as Associate Chairman of Endodontics at the University of Minnesota and Chairman of Endodontics at the University of Iowa before joining the Faculty of Dentistry, University of Alberta in July, 1982. He is currently Professor and Chairman, Division of Endodontics at the University of Alberta. His research interests are in the intra-oral use of lasers, the development of new clinical endodontic techniques, instruments and materials for canal preparation and obturation, and dental epidemiology. He has made numerous presentations to dental societies and study clubs, and at various universities and major dental meetings on both clinical and research topics in endodontics. He has recently received a Heritage Foundation grant for dental laser research. He has published both clinical and research articles in a variety of dental journals. Dr. Zakariasen maintains a part-time private endodontic practice in Edmonton.

GET RICH SLOW

HERBERT ABRAMSON
B.A., LL.B.

SYNOPSIS

The speaker will address a number of issues relating to investment philosophy that contribute to making winning investments, including:

- understanding that investing is an art, not a science
- buying value, not rumors
- trading risk for patience
- keeping it simple
- whole brained investing
- buying low, selling high, investing and crowd philosophy
- taking long profits and short losses
- importance of diversification
- choosing a portfolio manager or broker

BIOGRAPHY

Herbert Abramson is a director of Conner, Clark & Company Ltd., a Toronto based brokerage firm which specializes in portfolio management, and is responsible for managing significant investment portfolios for many business and professional people.

He is a regular columnist for The Money Letter, Canada's most widely circulated investment letter.

Mr. Abramson is a graduate of the University of Toronto, with a Bachelor of Arts and Bachelor of Law degree and is a member of the Law Society of Upper Canada. Before he entered the investment business he was a partner of Goodman and Carr, a major Toronto law firm, specializing in corporations and securities law.

He is also President of General American Technologies Inc., and a director of Meridian Technologies Inc.

POST & CORES: WHAT YOU LEARNED IS WRONG

Allan S. Deutsch, D.M.D.

SYNOPSIS

For years we were taught that posts should be totally rigid bodies. Their fit in the post-hole should be as accurate as possible; that absolutely no space should exist within the post-hole after post placement.

We have followed these rules for years and yet our incidence of poor post retention and vertical root fracture is still too high. These problems are a result of what we learned, not in spite of it.

This presentation discusses new concepts of post flexibility, venting and safety wells that allow maximum retention and at the same time definitively minimize vertical root fracture.

BIOGRAPHY

Dr. Deutsch graduated D.M.D. from Tufts University in 1973 and received a Columbia Dental School Certificate in Endodontics in 1976. He is currently Staff, Division of Continuing Education, University of Pittsburgh School of Dental Medicine, and Staff, Division of Continuing Education, University of Pennsylvania. Dr. Deutsch has published many articles in the Journal of Prosthetic Dentistry and has presented lectures in Israel, Japan and England as well as extensively throughout the United States. He is also a member of many dental societies and associations.

DIAGNOSIS AND EARLY TREATMENT FOR INTERNAL DERANGE- MENTS OF T.M.J.

JOHN H. GRYFE
D.D.S., F.R.C.D.(C)

SYNOPSIS

Here's a chance to sort out the cacophonous symphony of clicks, pops, and crunches that patients keep entertaining you with. A better understanding of the functional anatomy of the temporomandibular joint, will soon enable you to bring back more melodic music to your suffering patient's ears.

BIOGRAPHY

Dr. Gryfe is a graduate of the University of Toronto, and is in private practice of oral and maxillofacial surgery in Weston, Ontario. He is a fellow of the Royal College of Dentists and an Associate in the Department of Oral Pathology at the University of Toronto. Management of disorders of the TMJ has been and continues to be a major interest since the early days of his practice.

NUTRITION AND STRESS – HOW THEY INTERACT

ELIZABETH SNELL
B.SC., R.P.DT.

SYNOPSIS

Because stress affects all of us, it is important to learn how to handle it. Stress can be positive or negative – the stress of creative, successful work can be invigorating while the stress of failure or disease can be detrimental. Nutrition plays a very important role in stress. The response of the body to psychological stress as well as physical stress involves a series of physiological reactions that affect the body's utilization of certain nutrients. Specifically there are 3 ways in which nutrition and stress interact:

1. The diet can be a source of stress.
2. Diet can affect the body's response to stress by determining the coping capabilities of an individual when faced with the increased needs for vitamins and minerals, while at the same time food intake is often decreased.
3. Stress itself can also affect the body's dietary needs by increasing various nutrient requirements.

BIOGRAPHY

Elizabeth Snell is Director of Nutrition at The Fitness Institute and is President of Snell Associates Nutrition Consultants Inc. After graduation from the University of Toronto and internship at Toronto Western Hospital, she became the Director of Dietetics at the Donwood Institute, where she also acted as co-leader of an obesity program.

Currently Elizabeth counsels members of the Fitness Institute as well as non-members, on food habits and individual therapeutic dietary needs including weight maintenance, allergies, hypertension, diabetes and cardio-vascular disease.

Elizabeth conducts extensive nutrition seminars for many Canadian corporations and government departments on a variety of nutrition-related topics and has appeared on radio and television across Canada. She is a member of the Ontario Dietetic Association, Canadian Dietetic Association and the American Dietetic Association.

IS THERE ANYTHING YOU WANTED TO KNOW ABOUT X-RAYS AND WERE AFRAID TO ASK?

M.G. ALIBRANTI, B.Sc., R.T. (ARRT), O.T.R.Q.

SYNOPSIS

Is there anything you wanted to know about x-rays and were afraid to ask? Now's the time to come and find out all about dental radiation protection and how to help your patients understand it.

BIOGRAPHY

M.G. Alibranti is a member of the American Academy of Dental Radiologists and is a former lecturer and clinical demonstrator in the physics of radiology and dental radiographic technique at McGill University, Faculty of Dentistry. She has addressed several societies throughout Ontario and Quebec and is an international consultant as well as consultant to private dental practices concerning radiographic technique and radiation protection.

THE MAGIC OF COLOUR AND STYLE

GLORIA DEZELL

Gloria Dezell is a Visual Image Planning Consultant on the go in South Western Ontario. By nine a.m. she has already returned from her daily workout ready to handle another diversified day.

A typical business day may involve doing a corporate seminar on "Winning Images" or "Dressing for Success", instructing at a local college, personal consultations in her studio, client shopping or developing new material for image consulting. London's Visual Image Planning started last year and The Magic of Colour and Style Inc. launched in 1981. Gloria retains her search for novel, dynamic alternatives which meet the needs of her clients.

Gloria has previously conducted seminars for 3M Canada, The Board of Education, London, Professional Secretaries International and many more.

All levels of business agree that successful looking people beget success and Gloria has made this the underlying principle of her companies.

HONORARY LIFE MEMBERSHIP

HARVEY MILBURN, D.D.S.

The Academy of Dentistry, Toronto, is honored at its Annual Winter Clinic Meeting, 1985 to present for Honorary Life Membership in the Academy, Dr. Harvey Milburn.

Dr. Milburn was born June 4, 1903 in Chesley, Ontario. He attended Scone Public School and Chesley High School, where he excelled in track and field sports, competing in Hanover, Walkerton and Owen Sound.

Dr. Milburn started in Dentistry in 1921, following his brother, the late Dr. Sidney Milburn, who graduated in 1920. Following graduation in 1925, he started to practise in North Toronto at Belsize and Yonge Street, where he served a growing community for 52 years without ever missing a full week through illness.

Dr. Milburn continued his interest in athletics . . . playing tennis at the North Toronto and Lawrence Park Clubs, badminton at the Strathgowan Club and the Granite Club, where he also started to participate in curling. He still enjoys curling and has recently started lawn bowling.

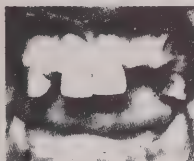

Dr. Milburn was President of the North Toronto Dental Association and went from there to the Academy, where he became President in 1956-7. The following year he served as Chairman of the Convention Committee of the Ontario Dental Association. During these times there were many social commitments where his late wife, Ruth, was a gracious hostess and a great help to him. Dr. Milburn has continued to take an interest at conventions and meetings ever since.

Since retirement in 1977, Dr. Milburn and his present wife, Helen have been very active in curling, duplicate bridge and lawn bowling at the Granite Club.

Dr. Milburn is a member of St. George's United Church and York Masonic Lodge. He has two daughters, Sheila Armstrong and Nancy Taylor and is very proud of his five grandchildren. Dr. Milburn and his wife Helen spend many happy times with all the family at their cottage on Lake Muskoka.

THE EQUIPOISE™ SYSTEM

Can you or your patients afford to be without it?

THE PROBLEM

THE SOLUTION

THE SUCCESS

A MUST FOR CLASP PROSTHESIS

- 1 The EQUIPOISE™ system directs all forces along the long axis of the tooth during function
- 2 Insures maximum esthetics
- 3 Produces maximum function
- 4 Protects preserves and strengthens the abutment teeth

De Luca Dental Laboratories

Full integrity, purity and protection are maintained by automatic dispensing units of investments. Controlled gold plating and etching is by automatic casting induction. Automatic stage-control burn out furnaces and finally air turbines complete this complex procedure.

Dental sculptors and colour experts determine the right characteristics to closely resemble the desired effects.

To utilize the latest in ergonomic technology, De Luca Laboratories has adopted 'State of the Art' equipment by KaWo, EWL and Degussa Canada Ltd. in its Dental Design Work. By incorporating these high tech, precious metal dental alloys by Degussa, we ensure high quality and complete satisfaction to our customers.

FIRST STATED MEETING

Friday, February 7 – Saturday, February 8, 1986

PROSPERITY IN DENTISTRY: EVOLVING FROM TRADITIONAL EXCELLENCE TOWARD HEALTH-CENTERED EXCELLENCE

MR. AVROM KING
Phoenix, Arizona

Avrom E. King is responsible for a considerable body of writing and research which is intrinsic to whole-person dentistry, and his seminars and lectures are widely attended throughout the USA and Canada. He is a frequent contributor to dental school programs and curricula. As a founder of the Nexus Group, Mr. King is concerned with the refinement and extension of private fee-for-service dentistry. His primary areas of activity involve the behavioral, managerial, economic and holistic aspects of health care. Mr. King holds graduate degrees in human development and social psychology.

The program is specifically designed for dentists in general and limited practice, career members of their staff and spouses.

Skills and abilities which have permitted the traditional dentist to thrive may not be sufficient to assure more than survival over the next ten years.

This program will examine these data and evolve alternatives; will evolve an ethical health-centred practice model for the consideration of those who choose to plan for their prosperity.

Mr. King's belief is that the dental profession stands at the very edge of a new "golden era" of prosperity, and that each dentist has the inherent capacity for attaining a future of choice, not chance.

Related questions of staff selection and management, client development, computerization, office design and extra oral services will be dealt with during the course of the program.

PAST PRESIDENTS OF THE ACADEMY 1940 to 1985

MEDIATIONS COMMITTEE REPORT

The Mediations Committee is very pleased that the number of patient complaints has been fewer this year than in the past. We hope this is due to the fact that dentists are providing the best care they know to their patients.

Every dentist has the right to practise as he or she wishes. However problems do arise when one practitioner makes comments or raises his or her eyebrows concerning the treatment performed by a peer. Before doing so, ask yourself a few questions such as:

1. Do I have knowledge of the condition under which "questionable" treatment was rendered?
2. Do I impose standards of treatment upon others that I do not impose upon myself?
3. Has a busyness problem prompted me to openly criticize my colleagues?
4. Have I surveyed my own treatment several years later and been completely satisfied with what I found?

When we become involved with this type of controversy we are demeaning dentistry and ourselves.

The Mediations Committee has always attempted to mediate complaints in a fair and equitable manner. We are available to help you defuse a situation with a patient before it escalates into a formal complaint.

In conclusion, I would like to thank all members of the Mediations Committee and the Academy office staff for their co-operation and help during the past year.

Gilbert Chapnick D.D.S.
Chairman, Mediations Committee

Registration Area**

WHAT WILL HAPPEN TO YOUR OFFICE IF YOU ARE SICK OR DISABLED?

ACADEMY OF DENTISTRY MUTUAL AID PLAN

This is a group of dentists who will help a member of the group at a time of distress. Ideally, the group will number about twenty, but the number fluctuates as people join and leave. If you are a member of this group, and are unfortunate enough to be unable to practise because of illness or accident, the members of the group will take turns in operating your practice, with your auxiliaries, to a maximum of four days per week, for a number of weeks. This will provide service for your patients in case of emergencies, completion of treatment in progress and maintain the flow of recall patients.

Some of the benefits are, maintaining service availability to your clientele and employment for your auxiliaries as well as preventing the formation of a huge backlog of patients waiting for your return. If it becomes necessary for a practice to be sold, the plan can maintain the viability of the practice until the sale can be completed. The other members of the plan will come to your office one day at a time, on a rotating schedule. If the group numbers 20, the remaining 19 dentists would be responsible for about one day each, every five weeks for each disabled dentist. Fees are charged in the usual way at the stricken dentist's office, and the contributing dentist does not receive compensation.

This plan has been available for several years and has worked well to date for the stricken dentist. You might want to ask a friend or two to consider joining, or perhaps start a whole new group. A set of by-laws has been adopted, but they can be changed if the need arises.

Further details and a copy of the by-laws are available at the Academy office - 967-5649 or by calling Barril Garshowitz, 229 Yonge Street, Ste. 213A, Toronto M5B 1N9, telephone 368-3375.

WINTER CLINIC
NOVEMBER 20, 1986
Metro Toronto Convention Centre

UNITED WAY REPORT

In 1984, the United Way Campaign was organized in a different manner than in past years. A single mailing only was sent out to the dentists of Toronto at the beginning of the Campaign in the early Fall. There were no follow-up mailings or telephone calls. The total amount collected was 20% less than in 1983. In the 1985 Campaign, there will be several follow-up mailings for those who have not responded to the first mailing. I am sure the contributions will come back up to previous levels for the dental division.

The overall Campaign did meet its objective and with a few changes they are planning, I'm sure next year will be even better.

Eva Saxell, D.D.S.

*Chairperson, Dental Division
United Way Campaign*

ASSOCIATE PLACEMENT SERVICE

The Associate Placement Service continues to be an important part of the Academy's function in the Metropolitan Toronto area.

At the present time there are more dentists seeking placements than there are vacancies. We urge all those who require associates to call the Academy office with their requirements.

To facilitate the Placement Service, we would ask that you inform the Academy office once your requirements have been met.

DENTAL NURSES AND ASSISTANTS REGISTRY

**SPONSORED BY
The Academy of Dentistry, Toronto**

**MR. I.M. HANNAH
1139 Royal York Road, Islington M9A 4A8
223-4390**

Call Mr. Hannah for complete information
regarding employment or full or part-time
assistants.

SCRAP AMALGAM DRIVE

The Ladies' Auxiliary of the Academy of Dentistry will collect scrap Amalgam and scrap gold in February, 1986. If you have not been contacted and you wish to contribute to this worthy cause, please call. Anyone from out of town attending the Winter Clinic and who wishes to contribute may bring their contributions with them.

EMERGENCY SERVICE REPORT

The Academy Emergency Program is running effectively. We have received the lowest number of complaints this past year either from the patients treated, the attending dentist, or the referring dentist. The restructuring of the service appears to have been in a positive direction. The service is meeting the needs of our patients and *you*, the referring dentist.

Our members saw 86% of the patients that actually called our answering service. Of the patients that were treated, 72% were referred to our emergency program by our members. The following is a breakdown of the six basic procedures performed by our members: Surgical 34.19%, Endodontic therapy 26.86%, Restorative 16.40%, Drug Prescriptions 14.82%, Periodontal therapy 6.13% and Denture adjustments and repairs 1.58%.

Busyness is always a concern with our service and I urge *you* to place our number your answering service or on your answering machine.

Our Hours: *Monday - Friday*
 4:00 p.m. - 1:00 a.m.
 Saturday, Sunday and Holidays
 9:00 a.m. - 1:00 a.m.
 TELEPHONE: 924-8041

During daytime hours, the Academy office (967-5649) will refer patients to dentists who accept new patients and/or will try to see them on short notice.

Aldo Boccia, B.Sc., D.D.S.
Chairman, Emergency Service

Businesskeeping for Dentists.

A timely new concept from Safeguard.

Today the information needed to manage a dental practice often goes beyond book-keeping and record keeping. It can involve planning, forecasting, playing "what if" games and developing other practice management information. Safeguard views all of these activities as Businesskeeping.

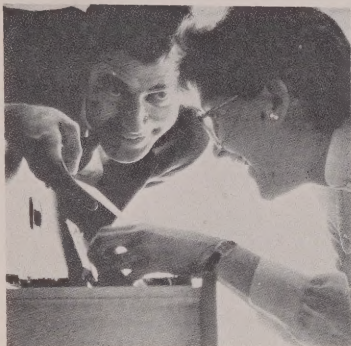

To cover these aspects of your practice, Safeguard offers computer systems as well as several specialized manual systems.

Safeguard's proven "one writing" accounting systems provide increased efficiency, accuracy and control, on a very cost effective basis — thereby enhancing practice management.

The "Mardan Dental Office Manager" is the in-house computer system for dental practice management. (Presently available in selected areas.)

We also offer three Color Coded Filing Systems each specifically designed to insure quick, easy and accurate retrieval of vital client information — thereby improving efficiency as well as increasing patient flow.

Across Canada, Safeguard is the Single Source for information used by 50,000 Source inform-systems over small businesses and professionals to make sound management decisions.

We offer Total Service through a unique network of more than 100 Safeguard Distributors and Service Representatives.

If you would like to know more about Businesskeeping products and services, or other proven practice building ideas, write us on your letterhead — today.
